A Little Yellow to Brighten Your Landscape?

L: Sundrops; R: Carolina Lupine

Sundrops, or *Oenothera fruticosa*, is a tough, durable perennial for hot dry sites. Growing up to 2 ft, it grows in full sun to light shade. The buds begin as red but open into beautiful bright yellow flowers in early summer. A fast growing, salt tolerant groundcover that attracts butterflies.

Carolina Lupine, or *Thermopsis villosa*, grows 3'-4' tall, prefers full sun. The lupine-like flowers are beautiful in the border, and when cut and brought indoors.

Need a Father's Day Gift?

We have attractive gift cards for any occasion. Stop in to purchase one today. How about purchasing a small tree for your landscape and tying a gift card onto the branch?
