Native Plants

Bring life to your landscape with native plants

Pollinators are birds, bats, butterflies, moths, flies, beetles, wasps, hummingbirds, small mammals, and bees. Image courtesy of Federico Stevanin at FreeDigitalPhotos.net

Pollinators are responsible for pollinating nearly one-third of every bite of food we eat and are essential to a healthy ecosystem, no matter where you live.

TOP THREE WAYS TO HELP POLLINATORS

Pollinators play a key role in keeping our ecosystems diverse. Unfortunately, they are in decline in many areas. Here are three things you can do to help pollinators in your landscape:

1. Plant native plants in your gardens. Some of the top pollinator attractors are Mountain Mint, Clethra, Asters, Liatris, Milkweeds, Coneflowers, Goldenrod and Monarda.
2. Reduce the amount of mulch or landscape fabric you use. Covering the ground with these materials eliminates important nesting sites for many pollinators.
3. Reduce or eliminate your use of pesticides. Many insects in your garden are friends, not foe. Identify the insect and learn about it before you decide if you need to control it.

Located 1.7 miles north of Tilghman Street on Route 100.

Edge of the Woods Native Plant Nursery LLC is a Woman-owned Business Enterprise.

[DIRECTIONS](#)

We have a beautiful selection of specimen trees: oak, Carolina silverbell, Hawthorne and more. For a limited time we are offering a free slow-release watering bag with purchase of any tree 8 foot or taller. *Not valid on special orders or prior purchases. Purchase must be made in person at the nursery. WHILE SUPPLIES LAST!*
