

Bring life to your  
landscape with  
native plants

### Silene caroliniana Wild Pink

Sun to part sun. **Blooms late spring.** Moist to dry. This durable plant resembles creeping phlox. Can be used as a 'groundcover' or in containers. Drought tolerant.

Our plants are ready to put in the ground for bloom next spring!

Now is the perfect time to plant perennials. The cooler nights will help with root establishment. The sooner you plant them, the better the roots will establish before soil temperatures cool.

Shop now for best selection. Right now the nursery is bursting with gorgeous native perennials. Come to see all the pollinators in action, if nothing else!

---

### How to Help Pollinators

Native plants support native pollinators. Choose a variety of bloom times, sizes, and shapes. It will create interest in your garden and the diversity will support a diversity of pollinators.

Butterflies, dragon flies, winged insects of all kinds, and more will visit your garden to provide entertainment for you while they pollinate.
