

# *Arctostaphylos uva-ursi* 'Massachusetts'

## 'Massachusetts' Bearberry

- 6 to 12 inches tall. Spreading two or more feet.
- Full sun to very light shade
- Best in poor, infertile, well drained, acidic, sandy soil
- Slow growing, evergreen groundcover
- Small, pinkish-white, urn-shaped flowers in April-May followed by bright red berries
- 'Massachusetts' has dark green leaves that are smaller than the species and it is disease resistant

Larvae host plant for  
Hoary Elfin and Brown Elfin butterfly
