

# *Diervilla lonicera*

## Dwarf Bush-honeysuckle

- Small, mounded shrub with arching branches. 2 to 4 feet tall.
- Spreads 2 to 4 feet
- Sun or light shade
- Moist to dry soils
- Yellow tubular flowers, summer to early fall, that may redden slightly as they are pollinated
- Red color in newly emerging leaves is most noticeable in the sun
- Spreads by suckering, good for stabilizing banks
