

Vaccinium corymbosum

Highbush Blueberry

- 6 to 10 feet high
- Full sun to part sun
- Prefers a moist, well drained soil.
- ACIDIC SOIL REQUIRED pH = 4.0 – 5.0
- White flowers in May
- Edible berry in summer
- Excellent fall color. A mix of reds, orange, purple and yellow
- Self fertile; plant more than one cultivar for best pollination
- This 'straight species' can be used to pollinate other cultivars

Native to PA
