

Podophyllum peltatum

Mayapple

- 12 to 18 inches high, 8 to 12 inch spread
- Part to full shade
- Average, medium moisture soil. Dormant in drought
- Single pearly white flower hidden beneath umbrella-like leaf in May
- Leaf can grow up to 12" diameter
- Useful for large, tough-to-grow areas
- Occasional yellow, plum-shaped edible fruit
- Relished by Box Turtles
- Unripe fruit is poisonous

Native to PA
