Suggested Hedgerow Plants

The following is a sampling of plants native to the Mid-Atlantic area that are suited for use in hedgerows. Other native species may also be appropriate.

Matching the 'right plant to right place' is important. Site selection is critical for the successful establishment of native species.

Native status is referenced in the database hosted by plants.usda.gov.

Native status can also be found in The Plants of Pennsylvania by Ann Rhoads and Timothy A. Block.

Botanic Name	Common Name	upland	moist
<i>Acer rubrum</i>	Red maple	x	x
