Juniperus virginiana
Eastern Red Cedar

- 30 to 50 feet tall
- 8 to 20 feet spread
- Form varies, though often broadly pyramidal once mature
- Full sun
- Average to dry, well-drained soils;
- Tolerates poor soils, drought, and salt
- Evergreen; tends to turn a bronze or coppery-red in winter
- Female plants produce blue “berries”
- Larval host for Juniper hairstreak

“Berries”
