Picea glauca
White Spruce

- 40 to 60 feet tall (possible taller)
- 10 to 20 feet spread
- Full sun to part shade
- Average to moist, well-drained soils
- Drought tolerant
- Conical form
- Useful as windbreak and screening
- A favorite winter food source for red and white-winged crossbills!
- Best planted north of USDA hardiness zone 6b (we are at the edge of its heat hardiness zone here in Lehigh County)
